Introduction to Blackrabbits' s mission

Blackrabbits has a mission: bring DeFi to the masses.

Decentralized finance, which utilizes technologies to remove intermediaries, middlemen, and banks from financial markets, is a complicated system to enter into.

Blackrabbits' s primary goal is to make it simple enough for even our mothers to be able to start earning passive income without having to understand this complicated DeFi world.

The first step towards achieving that goal was to create the Blackrabbits token. It is an innovative Reflection Token: one that pays dividends in an already established token instead of our own. Our dividends are paid out in \$Usdt, the premier BSC Swap on the market and a company whose tokens are getting more valuable all the time.

The rate of Crypto adoption in the world is growing, but the percentage of the world' s population who are users is still very small.

Blackrabbits tokenomics

There is a 5% Buy/Sell tax. At times, our tokenomics may change in response to market conditions.

The token contract employs a static rewards system. The 5% Buy/Sell tax is split as follows:

- 2% is redistributed to holders
- 2% is allocated to the Marketing wallet.
- 1% is used to fuel the liquidity pool

Blackrabbits divided distribution

The dividend mechanism incentivizes token holders to hold in order to earn dividends from the transactions (buys and sells).

The dividends are not dependent on the price of either Blackrabbits or Usdt. They are based purely on the volume and proportional to the Blackrabbits amount you hold in your wallet.

Under the Blackrabbits contract' s hood:

- All \$Usdt the contract gains are split proportionally between the token holders.
- To receive dividends a minimum token balance of 200,000 Blackrabbits is required to be held in a wallet.
- The contract keeps track of all the dividends due to each holder in a list.
- Every transaction processes a certain number of users from the list.
- The number of holders processed through each transaction is dynamic and based on transaction size.
- Holders will receive dividends from the queue based on their position in the list.
- It' s a fair system, fully automated.

Security

The Blackrabbits team has taken several steps to ensure optimal security.

There' s a 12-month lock on the liquidity pool, so holders can rest assured they can trade. DXLock, a cross-chain decentralized token and liquidity provider locker for Ethereum and BSC, is here to help as a middleman.

Token information:

Network:

Binance Smart Chain (BEP-20)

Name:

Blackrabbits

Symbol:

BRS

Contract address:

0xa36a69D3631046253850230ffaD265747821eCc3

Decimals:

18

Total Supply:

1,000,000,000,000,000

Fair Launch Time:

N/A

Liquidity:

Locked on Pinksale.app

Thank you for your interest in Blackrabbits.
